📍 **Address:** Darmaraja District, Sumedang Regency, West Java, Indonesia

Profile

An enthusiastic Informatics Engineering student with expertise in programming, software development, and data analysis. Although I do not yet have professional work experience, I have successfully completed various academic projects involving web application development, data processing, and machine learning algorithm implementation. Proficient in programming languages such as Python, Java, PHP, and JavaScript, with a strong understanding of databases and operating systems. I am eager to apply my technical knowledge and skills in a real-world work environment and am committed to learning and contributing within a dynamic team..

Project Academic and Jobs experience

Fullstack Developer website SunnyMart (Project Academic)

May 2024 – June 2024
